**DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING**

**REGISTER NUMBER :**

**SUBJECT : NAAN MUDALVAN – EMPLOYABILITY SKILLS**

Certified that this is the bonafide record of work done by the student\_\_\_\_\_of  
4<sup>th</sup> Semester of Computer Science and Engineering (Full-time) branch during the academic year 2025-  
2026.

**FACULTY IN-CHARGE**

**HEAD OF THE DEPARTMENT**

Submitted for the Practical Examination held on

\_\_\_\_\_  
at Government College of Engineering, Bargur.

**INTERNAL EXAMINER**

**EXTERNAL EXAMINER**

**GOVERNMENT COLLEGE OF ENGINEERING, BARGUR  
(Autonomous)**

**DEPARTMENT OF COMPUTER SCIENCE AND  
ENGINEERING**

(Accredited by NBA)

**VISION:** To endow with exceptional computer science education by building well-built training and research environment

**MISSION:** To offer high quality graduate program in computer science and to prepare students for professional career or higher studies, The department promotes brilliance in teaching, research, mutual activities and Construction assistance

**PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)**

- PEO1:** Be good at in professional career and/or higher education by acquiring understanding in mathematical, computing and engineering principles.
- PEO2:** Explore real life problems, design computing systems apt to its solutions that are technically sound, economically practicable and socially satisfactory.
- PEO3:** Demonstrate professionalism, ethical attitude, communication skills, team work in their profession and adapt to current trends by engaging in lifelong learning.

## Create a PPT in Gamma AI on the topic “Interview Preparation”

Date:

### AIM:

To create a professional and interactive AI-assisted presentation using Gamma AI on the topic “Interview Preparation” and develop communication, presentation design, and digital productivity skills aligned with Employability Skills syllabus

### Tools Required:

- Gamma AI Platform (<https://gamma.app>)
- Internet Connection
- Laptop or Desktop Computer

### Theory:

Employability Skills 2.0 focuses on developing professional communication, digital literacy, AI-assisted productivity, teamwork, leadership, and career readiness aligned with modern workplace standards. AI-powered platforms like Gamma AI help users generate structured presentations quickly while maintaining professional design quality. This experiment supports presentation skills, workplace communication, and digital proficiency by integrating AI tools into content creation and professional storytelling practices.

### Procedure:

1. Understand the objective of creating an AI-assisted presentation related to interview preparation.
2. Open Gamma AI platform and log in using valid credentials.
3. Select presentation template or create a new AI-generated slide deck.
4. Enter the topic “Interview Preparation” and generate structured content using AI assistance.
5. Edit slides to ensure clarity, professional tone, and logical flow of information.
6. Add headings, bullet points, visuals, and icons to improve presentation quality.
7. Review grammar, formatting, and design consistency.
8. Export the final presentation as PPT or share via link.
9. Evaluate the output based on communication effectiveness and professional presentation standards.

## Output:

## Result:

The experiment was successfully completed using Gamma AI, enhancing presentation skills, digital creativity, and confidence in preparing professional interview-related content using AI technology.

Ex No:2

## Create a Resume using Canva / Overleaf

Date:

### AIM:

To design a professional and industry-ready resume using Canva or Overleaf that demonstrates structured self-presentation, digital design skills, and career readiness aligned with Employability Skills syllabus.

### Tools Required:

- Canva / Overleaf Platform
- Internet Connection
- Computer System

### Theory:

Employability Skills 2.0 emphasizes professional identity development, digital literacy, and effective communication required for modern workplaces. A well-structured resume acts as a personal marketing document that highlights skills, achievements, and career goals. Platforms like Canva and Overleaf provide AI-assisted templates and professional formatting tools that help individuals create visually appealing and industry-standard resumes while improving digital productivity and self-branding abilities.

### Procedure:

1. Understand the importance of resume design in career development and job applications.
2. Open Canva or Overleaf and sign in using valid credentials.
3. Choose a professional resume template suitable for academic or technical profiles.
4. Enter personal details, education, skills, projects, and achievements in structured sections.
5. Maintain professional language, consistent formatting, and clear alignment.
6. Customize fonts, spacing, icons, or layout to improve readability and visual balance.
7. Review the resume for grammatical accuracy and professional tone.
8. Export the final resume in PDF format for job applications.
9. Evaluate the resume based on clarity, structure, and industry presentation standards.

Output:

Result:

The experiment was successfully completed by designing a professional resume, improving digital documentation skills, career presentation ability, and understanding of industry-standard resume formats.

Ex No:3

Date:

## Prepare a Short Video Resume using Canva Video or Synthesia AI

### AIM:

To create a short AI-assisted video resume that demonstrates professional self-introduction, communication clarity, and digital presentation skills aligned with Employability Skills syllabus.

### Tools Required:

- Canva Video / Synthesia AI
- Microphone / Camera
- Internet Connection

### Theory:

Employability Skills 2.0 encourages the use of digital tools and AI platforms to enhance professional communication and personal branding. A video resume allows candidates to present their personality, confidence, and communication skills beyond traditional text resumes. Platforms like Canva Video and Synthesia AI help users create structured and visually engaging video content using templates, voiceovers, and AI-generated visuals, improving creativity, storytelling ability, and digital proficiency required in modern hiring environments.

### Procedure:

1. Understand the purpose and structure of a professional video resume.
2. Open Canva Video or Synthesia AI and log in using valid credentials.
3. Select a video template or create a new project with appropriate layout.
4. Prepare a short script including self-introduction, skills, achievements, and career goals.
5. Record video or generate AI avatar narration using the platform features.
6. Add text overlays, transitions, and visuals to enhance clarity and engagement.
7. Maintain professional tone, clear voice delivery, and proper timing.
8. Review the video for audio clarity, grammar accuracy, and visual consistency.
9. Export the final video file and evaluate it based on communication effectiveness and personal branding quality.

Output:

Result:

The experiment was successfully completed by producing a structured video resume, improving confidence, communication skills, and digital content creation abilities relevant to modern recruitment practices.

|         |                                                                   |
|---------|-------------------------------------------------------------------|
| Ex No:4 | <b>Create a LinkedIn Profile and Showcase Professional Skills</b> |
| Date:   |                                                                   |

**AIM:**

To create and optimize a professional LinkedIn profile that highlights skills, achievements, and career interests while improving digital networking and personal branding aligned with Employability Skills syllabus.

**Tools Required:**

- LinkedIn Account
- Computer / Smartphone
- Internet Connection

**Theory:**

Employability Skills 2.0 emphasizes professional networking, digital presence, and career identity development. LinkedIn is a professional networking platform that allows individuals to showcase skills, experience, certifications, and achievements while connecting with industry professionals. Creating an optimized LinkedIn profile improves visibility, communication credibility, and career opportunities. This experiment supports digital literacy, professional branding, and online workplace etiquette by applying structured profile-building strategies aligned with modern industry expectations.

**Procedure:**

1. Understand the importance of LinkedIn for professional networking and career development.
2. Open LinkedIn and log in or create a new account using professional credentials.
3. Add a professional profile photo and write a clear headline reflecting career goals.
4. Complete profile sections including About, Education, Skills, Projects, and Certifications.
5. Use professional language and structured content to improve readability.
6. Add skills relevant to academic background and career interests.
7. Connect with classmates, mentors, or professionals to build a professional network.
8. Review profile for completeness, grammar accuracy, and professional presentation.
9. Save updates and evaluate profile effectiveness based on industry standards.

| Ex No:5 | <b>Mock Interview Practice using ChatGPT / Interview Warmup by Google</b> |
| Date:   |                                                                           |

**AIM:**

To simulate real interview scenarios using AI-based platforms in order to improve confidence, communication clarity, and response structure aligned with Employability Skills syllabus.

**Tools Required:**

- ChatGPT or Interview Warmup by Google
- Microphone / Internet Connection
- Laptop or Smartphone

**Theory:**

Employability Skills 2.0 focuses on interview readiness, professional communication, and critical thinking required in modern recruitment processes. Mock interviews help candidates practice structured responses, improve confidence, and understand employer expectations. AI-based platforms such as ChatGPT and Interview Warmup provide instant feedback, question simulations, and response analysis, enabling learners to enhance articulation, clarity, and problem-solving ability. This activity supports career readiness by combining communication skills with digital tool proficiency.

**Procedure:**

1. Understand the purpose of mock interviews in developing professional communication skills.
2. Open ChatGPT or Interview Warmup platform and select interview practice mode.
3. Choose relevant job role or general HR interview questions.
4. Respond to questions verbally or in written format using clear and professional language.
5. Apply structured answering methods such as introduction, explanation, and conclusion.
6. Analyse AI feedback regarding communication clarity, confidence, and content quality.
7. Improve responses by correcting grammar, tone, and logical flow.
8. Repeat practice sessions to enhance confidence and response accuracy.
9. Evaluate performance based on clarity, confidence, and professional communication standards.

## Output:

Here are **Mock Interview Practice Questions** you can directly use for your record (especially useful for CSE / employability skills):

---

### ◆ 1. Basic Introduction Questions

1. Tell me about yourself.
2. What are your strengths and weaknesses?
3. Why did you choose Computer Science Engineering?
4. What are your career goals?
5. How do you describe yourself in one sentence?

---

### ◆ 2. Academic Questions

1. What are your favorite subjects and why?
2. Explain a project you have done.
3. What programming languages do you know?
4. What is the difference between C and Python?
5. What is Data Structure? Why is it important?

### ◆ 3. Technical Questions (CSE Core)

1. What is an algorithm?
2. What is the difference between stack and queue?
3. Explain OOP concepts.
4. What is DBMS?
5. What is normalization in databases?
6. What is the difference between HTTP and HTTPS?
7. What is an operating system?
8. What is a compiler?
9. What is recursion?
10. What is a primary key in SQL?

### ◆ 4. Problem-Solving Questions

1. How would you solve a difficult technical problem?
2. Explain a situation where you faced a challenge and how you solved it.
3. How do you debug errors in your code?
4. What steps do you take before starting a project?

### ◆ 5. Behavioral Questions

1. Tell me about a time you worked in a team.
2. How do you handle pressure or deadlines?
3. Describe a failure and what you learned from it.
4. How do you handle criticism?
5. Are you a leader or a team player?

### ◆ 6. HR Questions

1. Why should we hire you?
2. What do you know about our company?
3. Are you willing to relocate?
4. What are your salary expectations?
5. Do you have any questions for us?

### ◆ 7. Situational Questions

1. What will you do if you don't know the answer in an interview?
2. How will you handle conflict in a team?
3. What if your project fails?
4. How will you learn a new technology quickly?

**Result:**

The experiment was successfully completed by practicing AI-assisted mock interviews, improving confidence, articulation, and understanding of professional interview techniques.

|         |                                                                     |
|---------|---------------------------------------------------------------------|
| Ex No:6 | <b>Write an Email for Job Application using Grammarly / ChatGPT</b> |
| Date:   |                                                                     |

**AIM:**

To practice writing a professional job application email using AI-based writing assistants while improving formal communication, grammar accuracy, and workplace email etiquette aligned with Employability Skills syllabus.

**Tools Required:**

- Grammarly / ChatGPT
- Internet Connection
- Laptop or Smartphone

**Theory:**

Employability Skills 2.0 emphasizes professional written communication as an essential workplace competency. A well-structured job application email reflects professionalism, clarity, and strong communication skills. AI-based tools such as Grammarly and ChatGPT assist users in generating grammatically correct, concise, and professionally formatted emails. This experiment supports written communication development, digital literacy, and professional etiquette by applying structured email writing practices used in corporate environments.

**Procedure:**

1. Understand the structure of a professional job application email.
2. Open Grammarly or ChatGPT and access writing assistance features.
3. Draft the email including subject line, greeting, introduction, body content, and closing statement.
4. Clearly mention job role, qualifications, and purpose of communication.
5. Use professional tone and avoid informal language.
6. Review grammar, punctuation, and sentence clarity using AI suggestions.
7. Edit formatting to ensure readability and professional appearance.
8. Finalize the email content and save or export the text.
9. Evaluate the email based on clarity, professionalism, and communication effectiveness.

## Output:

## Result:

The experiment was successfully completed by drafting a professional job application email, improving written communication skills, digital literacy, and understanding of workplace email etiquette.

Ex No:7

## Create a Presentation in Gamma AI on “Teamwork and Leadership Skills”

Date:

### AIM:

To design an AI-assisted presentation highlighting teamwork and leadership skills required in professional environments while improving communication, collaboration awareness, and presentation abilities aligned with Employability Skills syllabus.

### Tools Required:

- Gamma AI Platform (<https://gamma.app>)
- Internet Connection
- Laptop or Desktop Computer

### Theory:

Employability Skills 2.0 emphasizes teamwork, leadership qualities, and effective communication as essential competencies in modern workplaces. Presentations help individuals organize ideas, communicate clearly, and demonstrate leadership thinking. AI platforms such as Gamma AI assist in generating structured slides, visual layouts, and professional content, enabling learners to focus on collaboration concepts, communication clarity, and workplace problem-solving strategies. This experiment strengthens digital literacy and presentation design aligned with industry expectations.

### Procedure:

1. Understand the concepts of teamwork and leadership within professional environments.
2. Open Gamma AI and log in using valid credentials.
3. Create a new presentation project and enter the topic “Teamwork and Leadership Skills.”
4. Generate slide structure using AI assistance or templates.
5. Add key points such as communication, collaboration, decision-making, and conflict resolution.
6. Enhance slides with visuals, icons, and structured bullet points.
7. Maintain professional language and logical flow of content.
8. Review presentation for grammar accuracy, design consistency, and clarity.
9. Export or share the final presentation and evaluate its effectiveness.

## Output:

# The Power Duo: Mastering Teamwork and Leadership for Success

Unlocking organisational excellence through the synergy of effective leadership and collaborative teamwork.

## Result:

The experiment was successfully completed by creating an AI-assisted presentation, improving presentation design, communication clarity, and understanding of teamwork and leadership principles.

Ex No:8

Date:

## Prepare a PPT using Gamma AI on “Time Management”

### AIM:

To design an AI-assisted presentation explaining effective time management techniques while improving planning, prioritization, and professional presentation skills aligned with Employability Skills syllabus.

### Tools Required:

- Gamma AI Platform (<https://gamma.app>)
- Internet Connection
- Laptop or Desktop Computer.

### Theory:

Employability Skills 2.0 highlights time management as a core professional competency that supports productivity, discipline, and goal achievement. Effective planning and prioritization help individuals manage tasks efficiently in academic and workplace environments. AI-based platforms like Gamma AI assist in structuring presentations quickly by generating organized content and professional slide layouts. This experiment combines digital literacy with personal productivity strategies, encouraging learners to communicate time management concepts clearly and professionally.

### Procedure:

1. Understand the importance of time management in professional and personal development.
2. Open Gamma AI platform and log in using valid credentials.
3. Create a new presentation and enter the topic “Time Management Techniques.”
4. Use AI assistance to generate slide structure including planning methods, prioritization, and productivity tips.
5. Add clear headings, bullet points, and visuals to improve understanding.
6. Maintain professional language and logical content flow.
7. Customize design elements such as fonts, icons, and layout for better presentation quality.
8. Review the presentation for grammar accuracy and visual consistency.
9. Export or share the final PPT and evaluate it based on clarity and professionalism.

## Output:

## Result:

The experiment was successfully completed by preparing an AI-assisted presentation, improving planning awareness, presentation design skills, and digital productivity abilities.

Ex No:9

## Develop a Personal SWOT Analysis using Canva or Notion

Date:

### AIM:

To create a structured personal SWOT analysis identifying strengths, weaknesses, opportunities, and threats for career planning while improving analytical thinking and self-awareness aligned with Employability Skills syllabus.

### Tools Required:

- Canva / Notion
- Computer / Internet Connection
- Laptop or Smartphone

### Theory:

Employability Skills 2.0 promotes critical thinking, self-evaluation, and structured decision-making as essential competencies for career growth. SWOT analysis is a strategic framework used to analyse internal strengths and weaknesses along with external opportunities and threats. Digital platforms like Canva and Notion allow users to create visually organized SWOT models, improving clarity, planning ability, and professional presentation. This experiment encourages reflective thinking and career strategy development using modern digital tools.

### Procedure:

1. Understand the purpose of SWOT analysis in personal and professional development.
2. Open Canva or Notion and create a new project or workspace.
3. Design a four-quadrant SWOT layout including Strengths, Weaknesses, Opportunities, and Threats.
4. Identify personal skills, habits, goals, and external career factors.
5. Write clear and concise points under each SWOT category.
6. Use icons, colors, or structured formatting to improve readability.
7. Maintain professional language and logical organization.
8. Review the analysis for accuracy, clarity, and completeness.
9. Save or export the final SWOT analysis and evaluate its usefulness for career planning.

## Output:

## Result:

The experiment was successfully completed by drafting a professional job application email, improving written communication skills, digital literacy, and understanding of workplace email etiquette.

Ex No:10

Date:

## Create a Portfolio Website using GitHub Pages or Notion

### AIM:

To design and publish a professional online portfolio showcasing skills, projects, and achievements while improving digital identity, personal branding, and career readiness aligned with Employability Skills syllabus.

### Tools Required:

- GitHub Pages / Notion
- Internet Connection
- Web Browser
- Laptop or Desktop Computer

### Theory:

Employability Skills 2.0 emphasizes digital presence and personal branding as essential elements of modern career development. A portfolio website acts as a professional platform to present projects, technical skills, achievements, and career goals to employers or collaborators. Tools like GitHub Pages and Notion enable users to build structured and visually organized web portfolios without advanced coding knowledge. This experiment supports digital literacy, communication clarity, and professional identity development by applying modern online publishing practices.

### Procedure:

1. Understand the purpose of creating a professional online portfolio.
2. Open GitHub Pages or Notion and log in using valid credentials.
3. Create a new page or repository for the portfolio website.
4. Add structured sections such as About Me, Skills, Projects, Certifications, and Contact details.
5. Use clear headings, simple layouts, and professional design elements.
6. Insert project descriptions, images, or links to demonstrate achievements.
7. Maintain professional language and organized navigation structure.
8. Publish the portfolio online and verify accessibility through a web link.
9. Evaluate the portfolio based on design clarity, content structure, and professional presentation.

## Output:

## Result:

The experiment was successfully completed by drafting a professional job application email, improving written communication skills, digital literacy, and understanding of workplace email etiquette.
